"The Aristocrat Of Evergreens"

THE MOST PICTURESQUE BOXWOOD HEDGE IN AMERICA

(5½ to 7 ft. high—4½ to 7 ft. spread—400 ft. long.)

PERMANENT BEAUTY AND SATISFACTION ARE THE RESULTS OF
PLANTINGS OF CONWELL'S BOXWOOD

A "Moving" Picture of a Box Tree

FOR OVER 70 YEARS THESE TREES GREW IN THE VALLEY OF VIRGINIA.

THEN IN A FEW DAYS THEY WERE

DUG AND READY TO HAUL

BY TRUCK AND TRAILER TO

LOAD ON CARS. BALLS OF EARTH SECURELY BRACED.
FOILAGE PROTECTED BY COVERS, SEWED ON.
THEY LOOK LIKE MINIATURE ZEPPELINS.

We Guarantee Our Boxwood Will Live and Thrive!

Due to improved methods and great care exercised in the transplanting, our Boxwood starts growing immediately.

The small fibrous roots are carefully preserved in digging and protected from sun, wind and damage in transit with a special made cover laced on with rope and which can and should be removed when planted.

Our Boxwood is *fresh dug* for your order.

In the last seven years our replacements have been less than one-tenth of one per cent.

While perfect Boxwood specimen and hedges are rare we do not emphasize *scarcity* as a selling point and attempt to handle inferior stock.

We have the perfect Boxwood specimen and hedges and offer them at most reasonable prices.

We invite your inquiries.

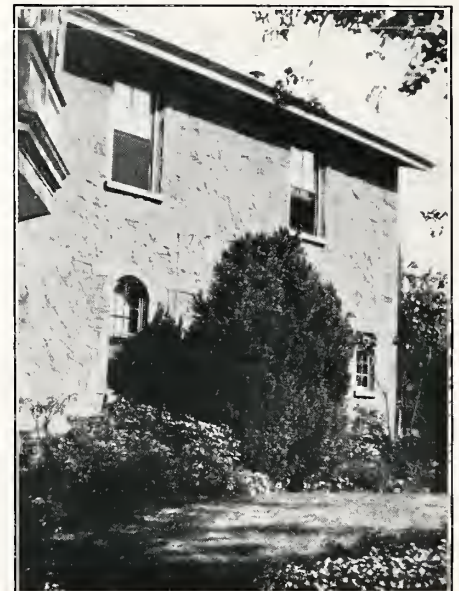

Within ten days the trees were growing on an estate in New Jersey.

A year later our client gives permission to use this picture by writing:

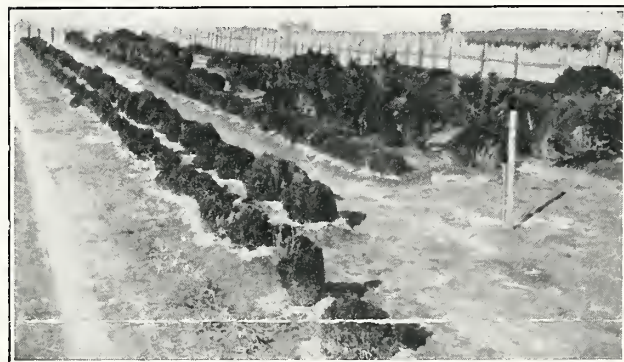

"You are quite welcome to use the photograph in your catalog.

The entire Boxwood planting is a source of continuous delight to our family."

The Finest and Largest Collection of Boxwood in America

Every Conceivable Size and Shape, the Highest Standard of Quality Always Maintained

BEAUTIFUL
BOXWOOD
HEDGES

VARIETY OF SIZES.
